Rado, R., Shimunkova, D., and Malyak, L.
DEGRADATION AND CHAIN BUILDING OF POLY-
PROPYLENE UNDER THE INFLUENCE OF PEROX-
IDES. [1962] [20]p. 8 refs.
Order from CTS or SLA \$1.60

63-10784

Trans. of Vysokomolekulyarnye Soedineniya (USSR)
1962, v. 4, no. 2, p. 304-311.

DESCRIPTORS: *Polyethylene plastics, *Propenes,
Polymers, Degradation, Polymerization, Chain re-
actions, Reaction kinetics, *Peroxides, Chemical bonds,
Molecular weight, Molecular isomerism.

Both in the case of polyethylene and polyisobutylene and
in the case of polypropylene, monomolecular decomposi-
tion of peroxide is accompanied by a chain reaction
with induced decomposition of the second order. From
evaluation of the double bond content in the polymer,
as well as from the kinetics of decomposition of the
(Materials--Plastics, TT, v. 10, no. 1) m(over)

63-10784

II. Shimunkova, D.
III. Malyak, L.

Office of Technical Services

peroxide, it follows that the macroradicals are formed not only as a result of a transfer reaction but also as a result of parallel reactions of addition to the primary radicals to the double bonds of the polypropylene. In the total reaction of the polypropylene macroradicals, the molecular weight is changed, which, when the peroxide concentration is increased, decreases at first to a minimum and then increases. The degradation reaction consists in the isomerization of the polymer radicals in the process of intramolecular transfer. Final transformation in the polyolefin chain depends both on the structure of the active group of the free radical and on the spatial disposition of the chain with respect to the active reactions of the polymer radicals.
